

◆ ONBOARDING • V1

Welcome to Wise Ai, Bundy Bowls & Leisure Complex.

Here's exactly what happens next, and what to expect from us.

PREPARED 20 MAY 2026

PROCESS • 01 → 03

How we work, in three moves.

01**Audit.**

We map your current operations, identify the biggest time and cost drains, and pinpoint where AI delivers the highest ROI.

02**Optimise.**

We refine workflows, remove friction, and design the AI systems before we build anything.

03**Implement.**

We build, integrate, and deploy the agreed solutions, then hand them over working end-to-end.

SCHEDULE

Your timeline.

Kickoff call

Audit delivered

Implementation complete

Handover & sign-off

FROM YOUR SIDE

What we need from you.

Access to the relevant systems we'll be working with. Read-only is fine to start.

A single decision-maker for sign-off. Speed kills with too many cooks.

Investment.

◆ STEP 01 • FIXED FEE

A\$450

The Audit.

AUD INCL. GST • FIXED

This is the premium. It reflects the research time and the depth of what you walk away with. Not a sales call dressed up as an audit. Before any AI work begins, this is what I do, and what you receive.

HOW IT WORKS

- A. I speak with you, one-on-one: goals, friction, what you wish would just go away.
- B. I speak with your employees: the people doing the work, where the real bottlenecks live.
- C. I observe the systems in use: how they're wired together, where data moves, and where it doesn't.

WHAT YOU RECEIVE

D-01

Findings presentation.

A live walkthrough of what I found: what can be implemented, the cost of each piece, the hours it returns, and how quickly each one can ship.

D-02

Summary document.

The take-home version. Same content, condensed for easy reading. Circulate it to your team or board without needing me in the room.

D-03

Full-scope invoice for implementation.

A single fixed quote for the recommended build, delivered alongside the audit documents. You either sign it off as-is, trim the scope, or walk away. No pressure, no surprise change orders later.

You finish the audit knowing, in dollars and in hours, what your operations are costing you, what's recoverable, and exactly what it costs to recover it.

◆ STEP 02 • OPTIONAL • SCOPED FROM AUDIT

Implementation.

Scoped from audit

INVOICED WITH AUDIT DOCUMENTS

The fee for implementation is determined entirely by the audit: what was found, what you decide to take forward, and what we agree on together. You'll receive the full-scope invoice with the audit documents, so you know the exact cost before any build begins. Payable on sign-off, once delivered.

◆ STEP 03 • OPTIONAL • AFTER HANDOVER

Ongoing partnership.

Keep me on the line for a 6 or 12-month term. Same direct access, but applied to the systems we've built and whatever you're considering next.

6-MONTH TERM

A\$200 /month

BILLED MONTHLY

12-MONTH TERM

A\$190 /month

BILLED MONTHLY

BETTER RATE

R-01

Changes to the systems we built.

Tuning, fixes, and net-new features on the agents and workflows we shipped, without re-quoting every time.

R-02

Ongoing consulting on the stack.

A second opinion on what to buy, what to drop, and what to build internally. Calls when you need them, not on a forced cadence.

R-03

Quotes and recommendations for what's next.

As your operations shift, I'll map the next opportunity, scope it, and price it, so the second and third project are quicker decisions than the first.

YOUR DIRECT LINE

No middle layer.

Tyler Wise
